

EDUCATION	
University of Arizona	Tucson, Arizona
Master's in information science, Gpa 3.9/4.0	August 2024 - May 2026
HKBK College Of Engineering	Bangalore, India
Undergraduate In Information Science, Gpa 3.2/4.0	September 2020 – June 2024

SKILLS SUMMARY	
Languages:	Python, SQL, Java, C, R
Frameworks:	Pandas, NumPy, Seaborn, Matplotlib, Stream lit
Tools:	Power BI, Excel, PowerPoint, Tableau, MySQL
Platforms:	Jupyter Notebook, Visual Studio Code, Google Collab
Soft Skill:	Report Building, Strong Stakeholder Management, People Management
Data Analysis:	Data Cleaning, EDA, Statistical Analysis
Machine Learning:	Regression, Classification, Clustering, API Integration
Deep Learning:	TensorFlow, Keras, PyTorch
Advanced AI:	LLM Agents, Explainable AI (XAI), RAG, FAISS
Tools & Concepts:	End-to-End ML Pipelines, Data Lineage, Semantic Search

WORK EXPERIENCE	
Jr. Data Scientist DevTown	Nov 2024 – Apr 2025
Industrial Training Program	
- Completed an intensive, project-based training program focused on real-world data science applications. - Built end-to-end data science projects across domains including retail, transport, marketing, and social media. - Applied machine learning techniques such as regression, classification, clustering, and recommendation systems. - Performed data cleaning, wrangling, and exploratory analysis using Pandas and NumPy. - Developed data visualizations using Matplotlib and Seaborn to communicate insights effectively. - Implemented web scraping solutions using BeautifulSoup for data collection. - Built deep learning models using TensorFlow, Keras, and PyTorch for advanced problem-solving.	
Data Analyst MedTourEasy	Sep 2024 – Nov 2024
- Worked in a professional analytics environment under mentor guidance on real-world datasets. - Collected, cleaned, and analyzed datasets to extract meaningful insights and ensure data integrity. - Conducted statistical analysis for the project “Death Age Difference Between Right-Handed and Left-Handed Individuals.” - Applied data preprocessing, visualization, and interpretation techniques to uncover trends. - Delivered insights with a strong focus on accuracy, clarity, and actionable outcomes. - Consistently met deadlines and contributed effectively to team-based tasks.	

PROJECTS	
ProvenAI: Immutable Data Lineage & Explainability in MCP-Based AI Agents	
University of Arizona Ongoing	
- Designed and developed ProvenAI, a framework for building auditable and explainable AI agents in MCP-based environments - Implemented a JSON-RPC interception middleware to track interactions between LLMs and external data sources - Built a Resource-Ablation Engine using KL-divergence to quantify data influence and detect hallucinations - Enforced mandatory evidence attribution for all model-generated outputs, improving transparency and trust - Integrated FAISS-based semantic retrieval with multi-source pipelines (APIs, local files, datasets) - Developed a Stream lit dashboard to visualize real-time “Chain of Evidence” and data usage patterns - Evaluated performance on HotpotQA benchmark, achieving ~90% attribution precision and improved reliability	
Technologies: Python, FAISS, Stream lit, JSON-RPC, MCP, LLaMA 3	
Concepts: Explainable AI (XAI), LLM Agents, Data Lineage, Attribution Modeling, Retrieval-Augmented Systems	
YouTube Data Extraction & Analysis	
- Integrated YouTube API using Python to extract data for top 50 videos. - Analyzed metrics like views, likes, and comments, computed engagement ratios. - Exported structured JSON datasets for further analytics.	
Job Market Analysis – Data Roles	
- Conducted data-driven analysis on job market trends for data-related roles. - Identified in-demand skills and created an “ideal candidate profile.” - Delivered insights via a structured PDF report with visualizations.	
TMDB Web Scrapping Project	
- Built a web scraping pipeline using BeautifulSoup to extract movie data. - Cleaned and structured data into pandas Data Frames. - Exported datasets into CSV for further analysis.	

CERTIFICATES	
Google Data Analytics Professional Certificate	Oct 2024
- Gained hands-on experience in data cleaning, analysis, and visualization - Worked with tools such as SQL, Tableau, and R - Developed job-ready skills for data analytics roles
