

Mohammad Faizan

Tucson, Arizona email.mdfaizan@gmail.com 520-286-0237 LinkedIn GitHub Portfolio

Skills

Languages: Python, SQL, Java, C, R

Data/ML: Pandas, NumPy, Scikit-learn, EDA, Data Cleaning, Statistical Analysis, Regression, Classification, Clustering

AI/Deep Learning: TensorFlow, Keras, PyTorch, Neural Networks, CNNs, NLP, Transformers, Self-Attention, LLMs, Generative AI, Embeddings, RAG, LLM Agents, LLM Fine-Tuning, LoRA, Explainable AI, Semantic Search

Multimodal/GenAI: CLIP, Contrastive Learning, Diffusion Models, U-Net, Text-to-Image Generation

Tools: FAISS, Hugging Face, Diffusers, Streamlit, FastAPI, MySQL, Power BI, Tableau, Excel, Jupyter Notebook, VS Code, Google Colab

Projects

ProvenAI: Explainable AI and Immutable Data Lineage for MCP-Based Agents

- Designed an auditable AI agent framework for data lineage, evidence attribution, and explainable model outputs.
- Built JSON-RPC interception middleware to track LLM interactions with tools, APIs, local files, and datasets.
- Developed a resource-ablation engine using KL divergence to measure evidence influence and hallucination risk.
- Integrated FAISS-based semantic retrieval for multi-source RAG workflows and citation-aware question answering.
- **Tech:** Python, FAISS, Streamlit, JSON-RPC, MCP, LLaMA 3, RAG, XAI

ModelSentinel: ML Model Monitoring and Drift Detection System

- Built an MLOps dashboard for model health, feature drift, data quality, alerting, and recovery validation.
- Implemented PSI and statistical drift checks to detect distribution shifts in production-style ML workflows.
- **Tech:** Python, FastAPI, React, Chart.js, Scikit-learn, MLOps

Tarnished AI: Resume-Aware AI Interview Coach

- Developed an AI interview coach using resume and job-description context for personalized preparation.
- Built mock interview, transcript review, and DOCX coaching-report workflows using LLM-based generation.
- **Tech:** React, FastAPI, Python, LLMs, DOCX Reporting

Data Analytics Projects: YouTube API, Job Market Analysis, TMDB Scraper

- Extracted YouTube video metrics using Python APIs, analyzed engagement ratios, and exported JSON datasets.
- Analyzed data-role job trends, identified in-demand skills, and created visual PDF reports.
- Built a BeautifulSoup scraping pipeline for TMDB movie data and exported clean CSV datasets.

Education

University of Arizona

Master's in Information Science, GPA: 3.9/4.0

Tucson, Arizona

Aug 2024 – May 2026

HKBK College of Engineering

Bachelor's in Information Science, GPA: 3.2/4.0

Bangalore, India

Sep 2020 – Jun 2024

Work Experience

Jr. Data Scientist — DevTown

Nov 2024 – Apr 2025

- Built end-to-end data science projects across retail, transport, marketing, and social media domains.
- Applied regression, classification, clustering, recommendation systems, and deep learning workflows.

Data Analyst — MedTourEasy

Sep 2024 – Nov 2024

- Cleaned, analyzed, and interpreted real-world datasets to extract insights and improve data quality.
- Conducted statistical analysis on death-age differences between right-handed and left-handed individuals.
